7th May 2008

National Clearance Hub (NCH)

The advent of the NCH is providing opportunities for logistics companies to use their existing Customs entry software to make clearances at all UK ports. It is now not always necessary to have a port agent to act on your behalf. Many companies who historically only handled their own 'Air' clearances are now completing 'Air and Ocean' clearances using the same software by utilising one of Albacore's Managed Connections.

All of the surface CSPs (Community System Providers) namely CNS, MCP, Pentant and Dover can accept connections to their system via an Albacore Managed Connection.

Albacore Managed Connections are ultra reliable and amongst many other features offer 24 hour support, enhanced printing and a unique dial backup facility. Having connections to additional CSPs also provides an alternate (cheaper) route for sending non-inventory linked entries such as NES and CFSP.

Albacore can provide the Managed Connection and arrange for the necessary contracts and badges etc. to be set-up. We can act as a one-stop-shop to setting up your Ocean Clearance Division.

If you would like more information about getting connected to the other CSPs please email or give us a call.

Yours sincerely

Cliff Atkinson
